

环保型交直交电磁搅拌器

Series of Environmental Protection Electric Magnetic Stirrer

结构特点:

- ◆ 装机功率小，功耗低。
- ◆ 功率因数高，电网侧谐波电流基本为零。
- ◆ 操作直观，灵活移动，人机界面图文显示，自动化程度高。
- ◆ 参数设计合理、先进、磁场强度高、深度大。
- ◆ 升降、移动均采用机械传动，工作可靠、安全、寿命长、无污染。
- ◆ 可实现“一机多炉”工作，应用范围广。
- ◆ 配置灵活选用方便。

structural characteristics

Small installed power, low power consumption

High power factor, grid side harmonic current is substantially zero.

Intuitive operation, flexible movement, Human Machine interface graphic display, high automatic degree.

The parameter is reasonable designed and advanced, with high magnetic field strength and large depth.

Lifting, moving both by mechanical transmission, reliable work, long service life, safety, no pollution.

With the protection of electrical and mechanical protective system, each operation has interlock and limit position control functions.

Can achieve “one stirrer, multi-furnace” work, wide range of applications.

Flexible configuration and convenient selection.
